

DROP - Excel Upload

- Search test definition (e.g.: 10462)

A search interface with four input fields stacked vertically. The first field is labeled 'Test Name'. The second field contains the text '10462' and has a small 'x' icon to its right. The third field is labeled 'Test Version'. The fourth field is labeled 'Source System'. A mouse cursor is visible near the bottom left of the search area.

Test Number	Test Name	Test Version	Source System
10462	Testdefinitiondemo	1	PDC

- In the top action bar, look for Excel and click on it.

Click on Excel

- An Excel Upload dialog box appears.

A dialog box titled 'Insert from Excel' with a close button (X) in the top right corner. It contains a 'Download Template' button in the top right. Below this, a text field displays 'Test Name & Test No: Testdefinitiondemo (Test No: 10462, Ver: 1)'. Under the heading 'Upload Excel', there is a checkbox labeled 'Notify Test Owner' which is currently unchecked. Below the checkbox is a yellow 'Choose File' button followed by the text 'No file chosen'. At the bottom of the dialog are two buttons: a grey 'Cancel' button and a green 'Upload Excel' button.

- **Download Template:**

Click on this button, and it will download an excel template to the download section of your PC based on the test definition you have opened.

Users can fill up the data in the excel template and save it again wherever they want.

- **Upload Excel:**

- Click on the “*Choose File*” button to select the excel file which you want to upload. Once the file is selected, it will display the details as shown in the screenshot below.

If the test definition contains measurements the Raw Data table details will be displayed below the Main Data Table details

- “**Notify Test Owner**”: This checkbox has been provided, in case users want to inform test definition owner that data has been uploaded.
- Now click on the “*Upload Excel*” button to upload the excel file. Excel file will be processed in the backend and uploaded successfully in case no errors encountered.

If errors have been encountered in the excel file, then an annotated excel file, with errors highlighted in the excel will be prompted for the user to download and fix the issues.

- **Annotated Excel File:**

- A message will appear on the UI and user must click on OK in order to download the annotated excel file.

NOTE: If user click on CANCEL then the annotated excel file will not be downloaded, and it will be lost. Users need to upload the excel file again to get a new error file.

- Annotated excel file will be downloaded and users can fix the issues and re-upload the same excel file. Errors will be highlighted in the file.
